GREETINGS FOR 1940 ---

I wish to thank all my patrons for their patronage the past year. I hope I may continue to please them. The season of 1939 was a very good one for blooms and made very fine large tubers.

There are great possibilities for people who live in the country or on farms to raise dahlias, both for selling cut flowers and tubers. Any one who is interested may write me and I will give him plans and prices on collections of a thousand dahlia tubers of varieties best suited to their need. Wishing you all a happy and prosperous New Year I am,

Yours very truly,

Dr. S. S. Shattuck

All persons taking discount must include postage or tubers will be sent by express.

POMPON DAHLIAS

The flowers are small and ball shaped, perfectly double to the center and are usually made of many small, quilled petals.

The demand for pompon dahlias has greatly increased in recent years and they are almost indispensable for table decorations. They may be had in almost all colors, bloom very freely and continuously, and keep better after cutting than the larger varieties. My collection of these has been carefully selected and all but the choicest varieties discarded.
